

Starting May 04 Gleason brings the show to you: **emotions** virtual show

With tradeshows and in-person visits at a minimum, access to new technologies can be limited. Until the world returns to business as usual, Gleason offers a solution: the “emotions” virtual show, an up-close, virtual experience that puts the latest technologies at the global gear industry’s fingertips.

April 21, 2021, Rochester, NY

Gleason Corporation is launching its first-ever virtual event, called “emotions” on May 4th to showcase the latest gear technology innovations for cylindrical and bevel gear design and manufacture. From May 4th through May 12th, Gleason will give visitors access to four showrooms featuring demonstrations of gear design, manufacturing, inspection and tooling solutions, including Closed Loop manufacturing, in-process inspection and detailed gear noise analysis. Exhibits will address solutions for the next generation of e-drive and power transmission products.

Each showroom will open with a special event topic, presented by industry experts:

May 04: Gear and Transmission Design

Product Liability and Developments in International Standards

Dr. Ulrich Kissling, KISSsoft AG, a Gleason Company

May 05: e-Drive Gears

Challenges and Solutions in Gear Design, Manufacturing and Measurement

Dr. Antoine Türich, Gleason Corporation

May 06: Industrial Gears

Race to CO2 Neutrality / Gear Manufacturing for Eco-Performance

Dr. Tim Gudzend, Gleason-Pfauter Maschinenfabrik GmbH

May 07, 2021: Bevel Gears

Diff² Double Differential for e-Drives

Prof. Dr. Hermann J. Stadtfeld, The Gleason Works

After each opening event participants can browse through the respective show rooms to experience the featured technologies, with or without a guided tour. Gleason's technology experts and product managers are going to be available through the duration of the virtual event to answer any question.

To register for "emotions", participate in the opening events, and get the first glimpse at what's next in gear technology, visit: [Welcome to emotions](#)
